

Dániel Gyürki

email: dgyurki@hds.bme.hu

position: Research associate

WPs involved with: WP4, WP5

My name is Dániel Gyürki; I'm a research assistant fellow at Budapest University of Technology and Economics. The main topic of my research is hemodynamics. I have experience in 1D modeling of the arterial system and in 3D CFD simulations of intracranial aneurysms. Apart from the the importance of initiation of treatment of arterial wall malformations, I am interested in fundamental research on the topic of hemodynamics as well.
