

Márton Németh

email: mnemeth@hds.bme.hu

position: Research associate

WPs involved with: WP4, WP5

My name is Márton Németh; I work in the hemodynamics field as a research engineer. My expertise lies in employing 3D simulations to solve fluid dynamics issues, mainly related to stenotic diseases. I'm also proficient in Python programming, and I always aim to extend my programming knowledge to be able to solve complex, hemodynamic-related problems.
