

Luca Bontempi, MSc

Luca Bontempi, born in Italy in 1999, earned his MSc degree in Biomedical Engineering from Politecnico di Milano in April 2024. His thesis, titled "Bridging Computational Modelling with In-vitro and 4D-flow MRI Testing: a Methodology Applied to Aortic Annuloplasty," was carried out at the Laboratory of Biological Structures (LaBS) at Politecnico di Milano and included a six-month research stay at the Cardiovascular Experimental Laboratory (CAVELab) at Aarhus University in Denmark. Following his graduation, in May 2024, he joined the PhD program at the Cardiovascular Biomechanics Laboratory within the Department of Cardiology at Erasmus MC in Rotterdam, The Netherlands.
